## EDUCATION

### Columbia University

M.S. Applied Mathematics

B.S. Applied Physics, minor in Applied Mathematics

New York, NY

(June 2021)

(May 2020)

**Relevant Graduate Coursework:** Data Mining, Machine Learning for Data Science, Natural Language Processing, Applications in Financial Machine Learning, Empirical Methods of Data Science, Mathematics for Data Science

### Susquehanna University (3-2 dual degree program with Columbia University)

B.S. Physics, minor in Computer Science | Dean's list | Departmental honors

Selinsgrove, PA

(May 2018)

## TECHNICAL SKILLS

**Programming:** Python (proficient, 6+ yrs), Bash/Shell, Java, SQL, UNIX / Linux

**Libraries:** PyTorch, Keras, TensorFlow, Scikit-learn, SciPy.stats, Pytest, NumPy, Pandas, Matplotlib, Plotly, Flask

**Other:** Git, Vim, Tableau, HTML, PostgreSQL, MongoDB, Docker, Kubernetes

## EXPERIENCE

### IBM

#### Data Science Intern

(Jun 2021 – Aug 2021)

- ❑ Performed clustering and unsupervised topic modeling with survey responses for 2 IBM product teams
- ❑ Wrangled terabytes of data made up of click streams, product usage, and NPS data to derive actionable insights
- ❑ Regularly presented visualizations and results to stakeholders, the VP of Client Advocacy, and other leadership

### Applied Technology Solutions, Inc. (ApTSi)

#### Artificial Intelligence Engineer Intern

(Sep 2020 – Jun 2021)

- ❑ Developed novel ML applications to automate portions of the doctor-patient interaction with NLP
- ❑ Wrote RESTful web microservices and APIs with Spring Boot and Java
- ❑ Advised necessary DevOps changes, leveraging Docker and Kubernetes to containerize applications

### Selective Corporate Internship Program (SCIP)

#### Marketing Analyst / Web Development Team Lead

(Aug 2020 – Jan 2021)

- ❑ Executed marketing strategies and presented in-depth analysis as a consultant for SCIP's corporate partners
- ❑ Spearheaded YouTube initiative by generating, editing, and promoting content → increased viewership over 300%

### Columbia University

#### Bioinformatics Researcher (Computational Genomics), with Dr. Itsik Pe'er

(Aug 2020 – Feb 2021)

- ❑ Applied neural networks (PyTorch) to predict 3 phenotypes of rats based only on genetic variants (SNPs) in DNA.
- ❑ Simulated rat genomes by creating additional data with generative adversarial networks, improving accuracy by 15%

#### Undergraduate Researcher (Astrophysics), with Dr. Marcel Agüeros

(Jan 2019 – May 2019)

- ❑ Performed spectral reduction, a method for correcting artifacts and instrumental defects in stellar spectra
- ❑ Built fluency with Linux/UNIX OS, scripting, and management of large datasets

### National Science Foundation Physics REU at University of Illinois Urbana-Champaign

#### Undergraduate Researcher (Machine Learning), with Dr. Joaquin Vieira

(May 2019 – Aug 2019)

- ❑ Implemented convolutional neural networks with Python TensorFlow to predict gravitational lensing parameters several million times faster than traditional methods
- ❑ Added functionality for predictive modeling with custom architectures, ResNets, Inception-v4, AlexNet, and Overfeat

### National Science Foundation Physics REU at Lehigh University

#### Undergraduate Researcher (Biophysics), with Dr. Slava Rotkin

(May 2017 – Sep 2017)

- ❑ Developed techniques for localization of single-wall carbon nanotubes inside of C17.2 neural stem cells.
- ❑ Worked extensively with Raman spectroscopy to analyze the effects of nanotube concentration on cell health

### Susquehanna University

#### Teaching Assistant & Tutor: Courses: Calculus, Physics I & II, Astrophysics I

(Aug 2016 – May 2018)

## PROJECTS

For additional information and projects: [github.com/Unique-Divine](https://github.com/Unique-Divine)

**RL Memory** | Efficient transfer learning in the deep reinforcement learning setting using Transformers (PyTorch) | [\[code\]](#) | [\[report\]](#)

**Algorithmic Stock Trading** | May 2020 – Present | I created an automated trading approach that blends NLP with traditional indicator analysis using news sentiment. Eventually, I began leading and collaborating with a team of 5 professional developers to help with implementation. We've seen consistent alpha and ROI (20%+) in paper trades, live trades, and backtests. Stock trend classification accuracy is also above 90%. Tools: PyTorch, RNNs, Transformers, Alpaca API

**Banknote Fraud Detection** | I wrote a decision tree algorithm from scratch that outperforms Scikit-learn's. [\[code\]](#)

**Langevin Dynamics for Neural Network Optimization** | Bayesian neural network implementations | [\[code\]](#) | [\[report\]](#)

**OTHER SKILLS/INTERESTS:** Japanese (advanced/fluent), saxophone, piano, guitar, reading, long-distance running
